

The rubric should contain a list of requirements/testing you plan to complete, the point allocation (make sure they sum up to 25), and some detailed explanations. Basically, you should turn in something like this:

#### Week 1

|                                   |   |             |     |   |
|-----------------------------------|---|-------------|-----|---|
| Requirements - Login View         | 6 | Mark        | 0-2 | <ul style="list-style-type: none"> <li>2 points: The user should be able to login to their Google Account and grant our app with the permission to access his calendar</li> </ul>   |
| Requirements - Calendar View      | 7 | Yu          | 0-2 | <ul style="list-style-type: none"> <li>1 points: <b>Displays all events.</b></li> <li>2 points: The user can easily navigate to different dates. <b>Events from different calendars are colored differently.</b></li> </ul>   |
| Requirements - Preference Storage | 6 | Mark        | 0-2 | <ul style="list-style-type: none"> <li>1 point: User's login information should be stored persistently. User should be able to continue viewing from where it's left off the last time he closed the app.</li> <li>2 points: User should be able to view events offline.</li> </ul> |
| Testing                           | 6 | Mark and Yu | 0-2 | <ul style="list-style-type: none"> <li>1 point: Provide manual test plan. 60% of those features is tested.</li> <li>2 points: 80% of the features is tested.</li> </ul>   |

#### Week 2

|   |   |     |    |  |
|---|---|-----|----|--|
| Requirements - "Add anniversaries" view | 6 | 0-2 | Yu | <ul style="list-style-type: none"> <li>2 points: There is a guide view for user to auto-create "important" events (100th day, anniversary day, birth date).</li> </ul> |
|---|---|-----|----|--|

|   |   |     |             |  |
|---|---|-----|-------------|--|
| Requirements<br>- “Create event” view                               | 6 | 0-2 | Yu          | <ul style="list-style-type: none"> <li>2 points: There is another view for user to create any event by directly inputting the title and the dates.</li> </ul>  |
| Requirements<br>- Synchronize events <b>and</b> connect it to views | 7 | 0-2 | Mark        | <ul style="list-style-type: none"> <li>1 point: Newly added events will be synchronized as long as the phone was online.</li> <li>2 points: New events will be synchronized later if the phone was offline.</li> </ul> |
| Testing   | 6 | 0-2 | Mark and Yu | <ul style="list-style-type: none"> <li>1 point: Provide manual test plan and unit tests. 60% of those features is tested.</li> <li>2 points: 80% of the features is tested.</li> </ul>                                 |

### Week 3

|  |   |     |    |  |
|--|---|-----|----|--|
| Requirements<br>- “Important Dates” view | 5 | 0-2 | Yu | <ul style="list-style-type: none"> <li>1 point: user should be able to view dates in a row</li> <li>2 points: user should be able to view all important dates in a row in a separate view with design</li> </ul> |
| Requirements<br>- “Detail Event” view    | 5 | 0-2 | Yu | <ul style="list-style-type: none"> <li>1 point: a popover would be presented</li> <li>2 points: user should be able to view the details of that specific event in a detailed view</li> </ul>                     |

|   |   |     |             |  |
|---|---|-----|-------------|--|
| Requirements<br>- Login to multiple Google accounts | 4 | 0-2 | Mark        | <ul style="list-style-type: none"> <li>1 point: User can login to multiple Google accounts.</li> <li>2 points: Events from all Google accounts will be shown in Calendar.</li> </ul>     |
| Requirements<br>- “Manage Google accounts” view     | 5 | 0-2 | Mark        | <ul style="list-style-type: none"> <li>1 point: User can logout of accounts using this view.</li> <li>2 points: User can choose which account to synchronize new events with.</li> </ul> |
| Testing   | 6 | 0-2 | Yu and Mark | <ul style="list-style-type: none"> <li>1 point: Provide manual test plan. 60% of those features are tested.</li> <li>2 points: 80% of the features are tested.</li> </ul>                |

#### Week 4 (Tentative)

|   |   |       |   |
|---|---|-------|---|
| Requirements - Create a launch screen       | 6 | 0-2.5 | <ul style="list-style-type: none"> <li>2 point: User should see a onboard page when the app is opened for the first time, and should be able to easily navigate through all functionality.</li> <li>2.5 points: 75% of the transitions are animated.</li> </ul>   |
| Requirements - “Manage created events” view | 7 | 0-2   | <ul style="list-style-type: none"> <li>1 point: There is a view listing only events created by our app. Events created by the same guide are shown together.</li> <li>2 points: Users can delete any <u>group of</u> events created by the same guide.</li> </ul> |

|  |   |     |   |
|--|---|-----|---|
| Requirements - Create another view "Add anniversary" | 6 | 0-2 | <ul style="list-style-type: none"> <li>• 2 points: There is a guide for user to create a group of related events.</li> </ul>  |
| Testing  | 6 | 0-2 | <ul style="list-style-type: none"> <li>• 1 point: Provide manual test plan. 60% of those features are tested.</li> <li>• 2 points: 80% of the features are tested.</li> </ul> |
